CONSOLIDATED FINANCIAL STATEMENTS AND

INDEPENDENT AUDITORS' REVIEW REPORT

MARCH 31, 2026 AND 2025

For the convenience of readers and for information purpose only, the auditors' report and the accompanying financial statements have been translated into English from the original Chinese version prepared and used in the Republic of China. In the event of any discrepancy between the English version and the original Chinese version or any differences in the interpretation of the two versions, the Chinese-language auditors' report and financial statements shall prevail.

INDEPENDENT AUDITORS' REVIEW REPORT TRANSLATED FROM CHINESE

To the Board of Directors and Shareholders of BizLink Holding Inc.

Introduction

We have reviewed the accompanying consolidated balance sheets of BizLink Holding Inc. and subsidiaries (the "Group") as at March 31, 2026 and 2025, and the related consolidated statements of comprehensive income, of changes in equity and of cash flows for the three months then ended, and notes to the consolidated financial statements, including a summary of material accounting policies. Management is responsible for the preparation and fair presentation of these consolidated financial statements in accordance with Regulations Governing the Preparation of Financial Reports by Securities Issuers and International Accounting Standard 34, "Interim Financial Reporting" that came into effect as endorsed by the Financial Supervisory Commission. Our responsibility is to express a conclusion on these consolidated financial statements based on our reviews.

Scope of Review

We conducted our reviews in accordance with the Standard on Review Engagements 2410, "Review of Financial Information Performed by the Independent Auditor of the Entity" of the Republic of China. A review of consolidated financial statements consists of making inquiries, primarily of persons responsible for financial and accounting matters, and applying analytical and other review procedures. A review is substantially less in scope than an audit and consequently does not enable us to obtain assurance that we would become aware of all significant matters that might be identified in an audit. Accordingly, we do not express an audit opinion.

Conclusion

Based on our reviews, nothing has come to our attention that causes us to believe that the accompanying consolidated financial statements do not present fairly, in all material respects, the consolidated financial position of the Group as at March 31, 2026 and 2025, and of its consolidated financial performance and its consolidated cash flows for the three months then ended in accordance with the Regulations Governing the Preparation of Financial Reports by Securities Issuers and International Accounting Standard 34, “Interim Financial Reporting” that came into effect as endorsed by the Financial Supervisory Commission.

Except IFRS 18, 'Presentation and disclosure in financial statements', the above standards and interpretations have no significant impact to the Group's financial condition and financial performance based on the Group's assessment. The quantitative impact will be disclosed when the assessment is complete.

A. The Group invested in the abovementioned equity instruments for medium- to long-term strategic purposes and expected to generate profit through the medium- to long-term investments. The Group's management elected to designate these investments in equity instruments as at fair value through other comprehensive income as it believes that recognising short-term fluctuations in these investments' fair values in profit or loss would not be consistent with the aforementioned medium- to long-term investment plan.

B. Amounts recognised in profit or loss and other comprehensive (loss) income in relation to the financial assets at fair value through other comprehensive income are listed below:

	Three months ended March 31,	
	2026	2025
Equity instruments at fair value through other comprehensive income

	Carrying amount of other equity which is continuously applicable to hedge accounting
Hedged items	
Cash flow hedges	
Expected purchases	$ 7,498

B. The Group uses copper as a raw material in the process and highly expects to sign copper purchase contracts with suppliers in the future according to its order demands. The contract price is based on the copper market price with a certain markup. In order to manage the copper price risk of the contracts, the Group utilizes copper futures contracts by the same notional amount and at the same maturity date as the cash flow risk hedging tool against the copper price risk contained in the contracts. Based on historical experience, changes in the cash flow component of the specified copper price risk are highly effective in covering the entire contractual cash flow changes.

For the anticipation of the highly probable expected purchase transactions, the main conditions (e.g., quantity and period) of the copper futures contract matched the hedged items. The Group periodically compares the number of open positions of copper and the expected purchase quantity change in order to assess the effectiveness of the hedge.

C. (Losses) gains on hedge effectiveness-amount that the Group recognised in other comprehensive income for the three months ended March 31, 2026 and 2025 amounted to ($13,008) and $14,905, respectively.

D. The Group has no notes and accounts receivable pledged to others as collateral.

E. As at March 31, 2026, December 31, 2025 and March 31, 2025, without taking into account any collateral held or other credit enhancements, the maximum exposure to credit risk in respect of the amount that best represents the Group's notes receivable and accounts receivable were their carrying amounts.

F. As at March 31, 2026, December 31, 2025 and March 31, 2025, the Group had outstanding discounted notes receivable to banks amounting to $8,501, $8,248 and $0, respectively. The Group has no payment obligation when the issuers of the notes refuse to pay for the notes at maturity. Those discounted notes receivable were deducted directly from notes receivable.

G. The Group has endorsed and transferred some bank acceptances receivable to other parties. Based on the assessment, the credit rating of the bank issuing such acceptances is relatively high and almost all of the risks and returns arising from the ownership of the bank acceptances have been transferred. Therefore, the bank acceptances were derecognised. As at March 31, 2026, December 31, 2025 and March 31, 2025, the outstanding derecognised bank acceptances receivable that the Group has endorsed and transferred amounted to $86,473, $66,572 and $45,979, respectively.

H. The Group entered into factoring agreements with financial institutions to sell its accounts receivable. The Group accounted for the accounts receivable as financial assets at fair value through profit or loss before the derecognition and derecognised it after it is sold. The Group has $46,982, $13,578 and $38,665 of accounts receivable that are expected to be factored to the financial institutions as at March 31, 2026, December 31, 2025 and March 31, 2025. Amount recognised in profit or loss because factoring accounts receivable for the three months ended March 31, 2026 and 2025 were $8,138 and $7,006 (shown as finance costs).

C. For the three months ended March 31, 2026 and 2025, share of profit (loss) and other comprehensive income of associates accounted for under equity method were calculated based on the financial statements which were not audited by the independent auditors. However, the Group’s management considered that there was no significant impact on the financial statements.

After the capital increase, the total preferred stock amounted to 4,340 thousand shares, representing a 9.92% ownership interest. As the Group obtained two seats on EpiSonica’s board of directors and therefore has significant influence, the investment is accounted for accordingly. Subsequently, the Group assessed the expected recoverable amount of the investment, a full impairment loss was recognized in 2025.

C. The impairment assessment of goodwill

(a) The impairment assessment of goodwill relies on the subjective judgement of the management, including identifying cash-generating units and determining its recoverable amounts. The Group assesses the recoverable amounts of goodwill for impairment at the end of the financial reporting period, and the recoverable amount is assessed based on the value-in-use.

(b) The value-in-use calculations use cash flow projections based on financial budgets approved by the management covering a five-year period. Cash flows beyond the five-year period are extrapolated using the estimated growth rate of 1%. The discount rates used reflected specific risks relating to the relevant operating segments and the current market assessments of the time value of money.

(c) The Group tests impairment for the cash-generating unit of goodwill at the end of the annual financial reporting period and uses value in use as the basis for calculating the recoverable amount, assessing for any indication of impairment at the end of each reporting period. As at March 31, 2026, there was no indication that goodwill could be impaired.

The Group recognized the transaction at fair value on the acquisition date, and recorded as other payables of $126,475 and other non-current liabilities-others of $189,713, respectively.

Note 2: It resulted from the purchase consideration adjustment based on the equity value at the acquisition date in accordance with the share purchase agreement, which had been paid during the third quarter of 2025.

Note 3: During the fourth quarter of 2024, the Group paid a consideration of $1,828,332 for acquiring the equity interest in EASYS. Subsequently, during the first quarter of 2025, the Group paid the contingent consideration of $68,928 due to the adjustments on net equity.

The goodwill recognized in the aforementioned business combinations is mainly derived from the synergistic effect of the expected combined operation of the Group and the acquiree.

C The fair values of the identifiable assets and goodwill from the acquisition of XFS is provisional pending completion of the appraisal report for those assets.

D. The operating revenue included in the consolidated statement of comprehensive income since January 5, 2026 contributed by XFS was $183,609. XFS also contributed profit before income tax of $32,095 over the same period. Had XFS been consolidated from January 1, 2026, the consolidated statement of comprehensive income would show operating revenue of $20,870,408 and profit before income tax of $3,038,509.

The Group manages its capital to ensure that entities in the Group will be able to continue as going concerns while maximising the return to stakeholders through the optimisation of the debt and equity balance.

The capital structure of the Group consists of net debt (borrowings offset by cash and cash equivalents) and equity attributable to owners of the Company (comprising share capital, capital surplus, retained earnings and other equity).

The Group is not subject to any externally imposed capital requirements.

Based on recommendations of the key management, in order to balance the overall capital structure, the Group may adjust the amount of dividends paid to shareholders, the number of new stock issued or repurchased, or the amount of new debt issued or existing debt redeemed.

B. Financial risk management policies

(a) The Group's major financial instruments included equity and debt investments, accounts receivable, accounts payable, bonds payable, borrowings and lease liabilities. The Group's treasury provides services to each business unit, coordinates access to domestic and international financial markets, monitors and manages the financial risks relating to the operations of the Group through internal risk reports which analyze exposures by degree and magnitude of risks. These risks include market risk (including foreign currency risk, interest rate risk and other price risk), credit risk and liquidity risk.

(b) The Group sought to minimize the effects of these risks by using derivative financial instruments to hedge risk exposures. The use of financial derivatives is governed by the Group's policies approved by the Board of Directors, which provided written principles on foreign exchange risk, interest rate risk, credit risk, the use of financial derivatives and non-derivative financial instruments, and the investment of excess liquidity. Compliance with policies and exposure limits is reviewed by the internal auditors on a continuous basis. The Group did not enter into or trade financial instruments, including derivative financial instruments, for speculative purposes.

(c) The treasury reports quarterly to the Board of Directors, an independent body that monitors risks and policies implemented to mitigate risk exposures.

C. Significant financial risks and degrees of financial risks

(a) Market risk

The Group's activities exposed it primarily to the financial risks of changes in foreign currency exchange rates and interest rates. The Group entered into a variety of derivative financial instruments to manage its exposure to foreign currency risk and interest rate risk, including foreign exchange forward contracts to hedge the exchange rate risk arising from exports.

There have been no changes to the Group's exposure to market risks or the manner in which these risks are managed and measured.

Exchange rate risk

i. The Group operates internationally and is exposed to exchange rate risk arising from the transactions of the Company and its subsidiaries used in various functional currency. Management has set up a policy to require group companies to manage their foreign exchange risk against their functional currency. The companies are required to hedge their entire foreign exchange risk exposure with the Group treasury.

ii. The Group has certain foreign currency receivables to be denominated in the same foreign currency with certain foreign currency payables, and therefore natural hedge is applied.

In addition, the Group utilises forward foreign exchange contracts to protect against reductions in the value of foreign currency assets and against the volatility of future cash flows caused by changes in foreign exchange rates. Foreign currency risk could be reduced but might not be fully eliminated by the use of forward foreign exchange contracts.

iii. The Group’s significant financial assets and liabilities denominated in foreign currencies aggregated by the foreign currencies other than functional currencies of the entities in the Group and the related exchange rates between the foreign currencies and the functional currencies were as follows:

iv. The Group’s foreign exchange losses, including realised and unrealised, for the three months ended March 31, 2026 and 2025 amounted to $137,781 and $52,906, respectively.

v. The Group was mainly exposed to the USD and the EUR.

vi. The following table details the Group’s sensitivity to a 1% increase in the functional currency against the relevant foreign currencies. A sensitivity rate of 1% is used when reporting foreign currency risk internally to key management and represents management's assessment of the reasonably possible change in foreign exchange rates. The sensitivity analysis included only outstanding foreign currency denominated monetary items and adjusts their translation at the end of the reporting period for a 1% change in foreign currency rates. The sensitivity analysis includes cash and cash equivalents, accounts receivable and accounts payable. The positive numbers in the following table indicate the amount of increase in net profit before tax when the United States dollar and the Euro dollar depreciates by 1% relative to the relevant currencies; when the United States dollar and the Euro dollar appreciates by 1% relative to the relevant currencies, its impact on the net profit before tax will be the negative number of the same amount.

	Impact of USD (Note)	
	Three months ended March 31,	
	2026	2025
Profit or loss	$ 139,170	$ 61,737

	Impact of EUR (Note)	
	Three months ended March 31,	
	2026	2025
Profit or loss	$ 1,210	$ 10,583

Note: This was mainly attributable to the exposure on net receivables, net payables and bank borrowings denominated in USD and EUR, which were outstanding and not hedged against cash flows at the balance sheet date.

Price risk

i. The Group was exposed to security price risk through its investments in marketable securities. The Group's management manages this exposure by maintaining a portfolio of investments with different risks.

ii. The Group's investments comprise equity securities, beneficiary certificates and hybrid instruments. The prices of equity securities and hybrid instruments would change due to the change of the future value of investee companies. If the prices of these equity securities and hybrid instruments had increased/decreased by 1% with all other variables held constant, post-tax profit for the three months ended March 31, 2026 and 2025 would have increased/decreased by $2,956 and $2,496, respectively, as a result of gains/losses on equity securities classified as at fair value through profit or loss. Other components of equity would have increased/decreased by $6,256 and $5,196, respectively, as a result of other comprehensive income on equity investments classified as at fair value through other comprehensive income.

iii. The Group's sensitivity to the increase or decrease in price risks is due to volatility of stock price.

Interest rate risk

i. The Group is exposed to interest rate risk because entities in the Group maintain both floating and fixed interest rates of bank deposits and borrowings.

ii. The carrying amounts of the Group's financial assets and financial liabilities with exposure to interest rates at the end of the reporting period were as follows:

	March 31, 2026	December 31, 2025	March 31, 2025
Interest rate risk on fair value			
- Financial assets	$ 12,854,153	$ 14,195,977	$ 6,631,216
- Financial liabilities	11,056,063	10,948,728	3,279,765
Interest rate risk on cash flow			
- Financial assets	6,296,771	7,195,417	3,907,178
- Financial liabilities	6,498,644	6,873,300	7,335,550

iii. The sensitivity analysis below was determined based on the Group's exposure to interest rates of non-derivative instruments at the end of the reporting period. For floating rate liabilities, the analysis was prepared assuming the amount of the liabilities outstanding at the end of the reporting period was outstanding for the whole year. A 100 basis point increase or decrease is used when reporting interest rate risk internally to key management and represents management's assessment of the reasonably possible change in interest rates.

iv. If the interest rates had increased by 100 basis points with all other variables held constant, the Group's pre-tax profit for the three months ended March 31, 2026 and 2025 would have decreased by $505 and $8,571, respectively. On the contrary, if the interest rates had decreased by 100 basis points, the amount of impact on pre-tax profit would be the negative number of the same amount. The main factor is the Group's exposure to floating-rate bank deposits and borrowings.

(b) Credit risk

i. Credit risk refers to the risk that a counterparty will default on its contractual obligations resulting in a financial loss to the Group. As at the end of the reporting period, the Group's maximum exposure to credit risk, which would cause a financial loss to the Group due to failure of counterparties to discharge an obligation, would arise from the carrying amount of the respective recognised financial assets as stated in the consolidated balance sheets.

ii. The Group adopted a policy of only dealing with creditworthy counterparties and obtaining sufficient collateral, where appropriate, as a means of mitigating the risk of financial loss from defaults.

iii. The Group provides receipts in advance 180 days after the end of the month credit policy to their customers on the sale of goods. In order to minimize credit risk, management of the Group has delegated a team responsible for determining credit limits, credit approvals and other monitoring procedures to ensure that follow-up action is taken to recover overdue debts. In addition, the Group reviews the recoverable amount of each individual accounts receivable at the end of the reporting period to ensure that adequate allowances are made for irrecoverable amounts.

iv. The Group assumes that if the contract payments were past due over 90 days based on the terms, there has been a significant increase in credit risk on that instrument since initial recognition; if past due over 365 days, a default has occurred.

v. The Group measures the loss allowance for accounts receivable at an amount equal to lifetime ECLs. The expected credit losses on accounts receivable are estimated using a provision matrix approach considering the past default experience of the customer, the customer's current financial position, economic condition of the industry in which the customer operates, as well as the GDP forecasts and industry outlooks. As the Group's historical credit loss experience does not show significantly different loss patterns for different customer segments, the provision for loss allowance based on past due status is not further distinguished according to the Group's different customer base.

vi. The Group writes off accounts receivable when there is information indicating that the debtor is experiencing severe financial difficulty and there is no realistic prospect of recovery of the receivable. For accounts receivable that have been written off, the Group continues to engage in enforcement activity to attempt to recover the receivables which are due. Where recoveries are made, these are recognised in profit or loss.

vii. The following table details the loss allowance of notes and accounts receivable (including related parties) based on the Group's provision matrix and individual assessments.

	Not past due	1~60 days past due	61~90 days past due	91~120 days past due	121-365 days past due	Over 366 days past due	Total

(c) Liquidity risk

i. The Group manages liquidity risk by monitoring and maintaining a level of cash and cash equivalents deemed adequate to finance the Group's operations and mitigate the effects of fluctuations in cash flows. In addition, management monitors the utilization of bank borrowings and ensures compliance with loan covenants.

ii. The Group relies on bank borrowings as a significant source of liquidity. The Group has the following undrawn borrowing facilities:

	March 31, 2026	December 31, 2025	March 31, 2025
Bank borrowing facility - undrawn amount	$ 16,703,529	$ 16,475,181	$ 15,308,523

iii. Liquidity and interest rate risk table for non-derivative financial liabilities

The following tables show details of the Group's remaining contractual maturity for its non-derivative financial liabilities with agreed upon repayment periods. The tables were drawn up based on the undiscounted cash flows of financial liabilities from the earliest date on which the Group can be required to pay. The tables included both interest and principal cash flows. Specifically, bank loans with a repayment on demand clause were included in the earliest time band regardless of the probability of the banks choosing to exercise their rights. The maturity dates of other non-derivative financial liabilities were based on the agreed upon repayment dates.

(3) Fair value information

A. The different levels that the inputs to valuation techniques are used to measure fair value of financial and non-financial instruments have been defined as follows:

Level 1: Quoted prices (unadjusted) in active markets for identical assets or liabilities that the entity can access at the measurement date. A market is regarded as active where a market in which transactions for the asset or liability take place with sufficient frequency and volume to provide pricing information on an ongoing basis.

Level 2: Inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly or indirectly.

Level 3: Unobservable inputs for the asset or liability.

B. Fair value information of investment property at cost is provided in Note 6(11).

C. Financial instruments not measured at fair value

Except for those listed in the table below, the carrying amounts of cash and cash equivalents, notes receivable, accounts receivable, other receivables, short-term borrowings, notes payable, accounts payable, other payables and long-term borrowings are approximate to their fair values.

	March 31, 2026			
		Fair value		
	Book value	Level 1	Level 2	Level 3
Financial liabilities:				
Convertible bonds	$ 8,542,272	$ -	$ -	$ 8,542,272

Financial liabilities:

The aforementioned bonds payable liabilities are measured at present value, which is calculated based on the cash flow expected to be paid and discounted using a market rate prevailing at balance sheet date.

(b) The methods and assumptions the Group used to measure fair value are as follows:

i. The Group used closing price as its fair value inputs (that is, Level 1) to measure the listed shares.

ii. Except for financial instruments with active markets, the fair value of other financial instruments is measured by using valuation techniques that are widely accepted in financial management.

iii. When assessing non-standard and low-complexity financial instruments, the Group adopts valuation technique that is widely used by market participants. The inputs used in the valuation method to measure these financial instruments are normally observable in the market.

iv. The valuation of derivative financial instruments is based on valuation model widely accepted by market participants, such as present value techniques and option pricing models. Forward exchange contracts are usually valued based on the current forward exchange rate.

v. The output of valuation model is an estimated value and the valuation technique may not be able to capture all relevant factors of the Group's financial and non-financial instruments. Therefore, the estimated value derived using valuation model is adjusted accordingly with additional inputs, for example, model risk or liquidity risk and etc. In accordance with the Group's management policies and relevant control procedures relating to the valuation models used for fair value measurement, management believes adjustment to valuation is necessary in order to reasonably represent the fair value of financial and non-financial instruments at the consolidated balance sheet. The inputs and pricing information used during valuation are carefully assessed and adjusted based on current market conditions.

E. For the three months ended March 31, 2026 and 2025, there was no transfer between Level 1 and Level 2.
